Safety, Health and Environment for Construction Site Managers

Who is the course for?

It is for people with line management responsibilities working in construction and need to understand their legal and practical health and safety and environmental responsibilities.

Course content

Our construction tutors can come to your site to deliver IOSH Safety, Health and Environment for construction site managers. As part of the course, managers will learn a variety of techniques to correctly implement the following:

- Local law and enforcement
- Preparing for work
- General management of the site, workers and contractors including for example:
 - The importance of method statements
 - The use of permits to work.
- The importance of managing environmental aspects and impacts related to construction projects
- Principles underpinning effective construction design and management
- The key issues and control of working at height including for example:
 - plans and risk assessments
 - roofs and fragile surfaces
 - working platforms and ladders
 - management, use and stability of scaffolds
 - fall arrest and suspension equipment.
- Site requirements for the welfare of construction workers on site
