

Astutis Risk Assessment In-Practice

Astutis.

Learning Method: Online 

Course Overview

The **Astutis Risk Assessment In-Practice** course is a one-day health and safety training programme designed to provide the latest guidance and expert insight on completing risk assessments in the workplace. Global organisations rely on risk assessments more than ever before to accurately describe the state of risks and hazards in the workplace; therefore, having staff competent and confident in completing risks assessment is a must for any workplace.

Who is the course for?

The course is designed for anyone responsible for completing risk assessments in their organisation or anyone accountable for someone whose role is to conduct risk assessments.

Benefits for Employers

- ▶ Have confidence that your staff can accurately and successfully complete workplace risk assessments to a professional standard.
- ▶ Possess a workplace culture that proactively seeks out and reduces risk and hazards.
- ▶ Have documented assessments of risks and hazards that may reestablish later. Understand how to best combat these risks and threats for a safer future working environment in your workplace.

Learning Outcomes

- ▶ Identify common causes of occupational accidents and ill health.
- ▶ Recognise different types of workplace hazards and manage the associated risks.

Course Key Facts

The course is available in the Online format and separately for organisations pursuing an in-company training experience. Organisations can also choose to have the course delivered virtually.

Duration: 4 hours

Course Content

The course focuses on the following areas:

- ▶ Where risk assessment fits within a safety management framework Accident causation and risk assessment
- ▶ Human Factors
- ▶ The law and risk assessment
- ▶ The meaning of the terms hazard and risk
- ▶ The Risk Assessment process
- ▶ Risk controls

Assessment

Learners must achieve 75% on a twenty-question multiple choice test at the end of the course to pass the course. Learners will be notified immediately of their marks.

- ▶ Conduct a legally compliant risk assessment following HSE guidance.
- ▶ Complete a generic workplace risk assessment under classroom guidance.
- ▶ Undertake risk assessments within your workplace.
