

Course Overview

CDM 2015 in Practice provides an in-depth explanation of the Construction (Design and Management) Regulations 2015. The course covers the specific interactive duties CDM places on those planning, managing, monitoring, coordinating and carrying out construction work.

Who is the course for?

Anyone working within construction, civil engineering, utilities, property management, and broadcasting and need to get up-to-speed on their legal responsibilities.

Benefits for Employers

- ▶ Protect your company against the risk of prosecution, fines, and property damage.
- ▶ Protect your staff against life-changing injuries and ill-health.
- ▶ Enhance your brand reputation with a commitment to good health and safety practice.

Benefits for Learners

CDM in Practice will teach you how to meet, and prove the adherence of, the requirements of CDM 2015. The course will also help you to understand general health and safety best practice. By the end of the course you'll be able to:

- ▶ Protect yourself and your company against prosecution by meeting your legal responsibilities.
- ▶ Maintain a safe workplace for you and your colleagues.
- ▶ Enhance your employability with essential, industry-specific knowledge.

Learning Outcomes

- ▶ Identify the particular issues relating to construction activities that affect health and safety.
- ▶ Explain the scope and application of CDM.
- ▶ Explain the responsibilities of the various duty holders under CDM.
- ▶ Explain the purpose and content of CDM documentation.

Course Key Facts

Duration: 16 hours online / two days classroom

Course Content

This course is split into five modules:

- ▶ Introduction to CDM 2015 and interpretation of scope, application and key terminology.
- ▶ Clients' new duties and responsibilities.
- ▶ The specific and practical interactive duties of planning, managing and coordinating between the five key duty holders.
- ▶ Overview of the general health and safety requirements for all construction sites.
- ▶ Key Documentation: Notification, Pre-construction Information, Construction Phase Plan, Health and Safety File.

Assessment

There is an online multiple choice test at the end of the course. Learners will receive an online certificate upon successful completion.
