

Course Overview

CDM 2015 Awareness gives learners an overview of the Construction (Design and Management) Regulations (CDM) 2015.

It covers the roles and responsibilities of different duty holders and general health and safety requirements for construction sites.

Learning Outcomes

- ▶ Understand the scope, application and interpretation of CDM 2015.
- ▶ Identify the responsibilities of the various duty holders.
- ▶ Understand the purpose and content of CDM 2015 documentation.
- ▶ Recognise the general health and safety requirements for construction sites.

Benefits for Employers

- ▶ Ensure your employees are working in compliance within relevant regulations and protect your company against the risk of criminal and civil prosecution.
- ▶ Ensure good management is in place to help reduce the risk of property damage, injury and ill-health.
- ▶ Ensure your team can deal with clients, designers and contractors from a position of knowledge and confidence.

Who is the course for?

Those involved in planning, managing or undertaking construction activities. The course also offers those new to CDM an introduction to the 2015 Regulations to help them understand their legal responsibilities.
