Cost – Benefit Analysis

Template 

Cost – Benefit Analysis Example

Category		Cost	Category		Benefit
Initial Investment		£200,000	Avoided Accidents Benefit		£574,266
Ongoing Costs		£163,400	Improved Productivity		£98,765
Cost of Accidents		£68,678	Cost Savings		£72,345
Productivity Loss		£3,455	Insurance Premium Reduction		£15,000
Regulatory Compliance Costs		£1,500	Other Benefits		£3,500
Other Costs		£5,643			
TOTAL COSTS		£442,676	TOTAL BENEFITS		£763,876
			NET BENEFIT		£321,200

- ▶ Customise the **categories** based on the unique aspects of your risk control decisions.
- ▶ Calculate the total for the **cost column** and then do the same for the **benefit column**.
- ▶ Subtract the **total costs** from the **total benefits**; the final figures will be your **net benefit** and money saved.

Important: This template is for example purposes only. It must not be copied and renamed as that would not satisfy the law and would not protect employees or the business.
