

# Virtual Classroom Training

The Virtual Classroom is our online classroom delivery tool within a Virtual Learning Environment. It has all the benefits of classroom study without the hassle and cost of travel.

## What does it include?

---

- Delivery of a course in a virtual classroom environment
- Interactive group discussions where questions will be answered and collaborative study on typical scenarios
- Practical exercises and exam practice
- Multiple simultaneous working groups
- Application of concepts in small teams
- Multimedia rich material to suit all learning styles and preferences
- Dedicated tutor support included from experienced NEBOSH examiner and CMIOSH member
- Focused exam preparation if required

## How it works

---

Our Virtual Classroom courses allow you to access award-winning classroom training, without leaving your home or office. We use the Zoom Meetings video conferencing platform. Before you start we suggest you check that you meet the Zoom Meeting system requirements and run a test meeting to ensure the software is compatible with your firewall settings. If it doesn't work, try adjusting your settings or contact your IT department about permitting the website.

## What equipment do I need?

---

For the majority of our courses, all you'll need is an internet-connected computer or laptop plus an audio connection, or a phone to dial in on, or headphones with a mic. A USB headset is best, but you can also use any bluetooth or mobile headphones, as long as they have a mic so you can interact with the virtual classroom.

Here's a recap on how to prepare:

- Reliable broadband,
- A Computer or mobile device,
- Access to Zoom Meeting software,
- Headphones,
- Microphone or mobile phone to dial in with,
- Camera or built in camera technology (optional),
- Pen and paper to make notes,
- The course notes (couriered to your home address prior to the course)

Before the start of the course we will send you joining Instructions by email.
